RECICLAM

RECOLLIDA SELECTIVA
PORTA A PORTA

The municipality of Binissalem in Mallorca has doorstep recycling collection scheme organized together with eight other municipalities: Alaró, Búger, Campanet, Consell, Mancor de la Vall, Lloseta, Santa Maria del Camí and Selva that are all part of the Mancomunitat des Raiguer.

It's been 11 years since Binissalem started with doorstep recycling of waste, where each household in the urban area deposits at the doorstep the 5-different set of materials according to a weekly calendar (organic matter, light packaging, glass packaging, paper and cardboard and non-recyclable residual waste). There is a Parc Verd or household waste recycling centre where to dispose most of household waste. The households outside the urban area must use the Parc Verd.

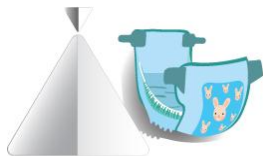

In 2012, Binissalem introduced the **RED BAG** system that taxes the excessive RESIDUAL WASTE (what is not recyclable) generated by each household. This type of waste can only be disposed in the municipality authorized bags. The municipality facilitates to every household that pays waste tax a certain number of these bags at no extra cost. Every extra bag needed will have to be acquired in one of the local shops according to need and this will constitute a variable tax. This variable tax is calculated on the basis of the treatment cost of the residual waste in each bag and is stipulated in the current waste management tax ordinance.

This system contributed to a significant increase in the recycling rates and the resulting environmental benefits, thanks to the collaboration of everyone.

In 2017 the WHITE BAG has been introduced, an authorized bag to deposit the “nappies”.

What is the WHITE BAG?

The WHITE BAG is an authorized bag that the municipality facilitates for free once need justified and registered. The resident can then dispose the nappies and pet excrements (dogs and cats) either at the doorstep the days that the calendar establishes or at the Parc Verd. In some cases, special sanitary waste can also go in this bag.

PARC VERD

The Parc Verd or household waste recycling centre is a municipal facility with access control where the public can dispose of special household waste. There are collection points for the following waste streams:

Household waste:

- ✓ Paper and cardboard ("Paper/Cartró")
- ✓ Glass ("Vidre")
- ✓ Light packaging ("Envasos Lleugers")
- ✓ Organic matter ("Orgànica")
- ✓ Residual waste ("Rebuig"). This can only be accepted in the authorized red bag or with the standardized sticker bought in the facility.
- ✓ Nappies ("Bolquers"). This can only be accepted in the authorized white bag
- ✓ Electrical and electronic devices without CFC (large household appliances, small electrical appliances, computer and telecommunications equipment, electrical appliances, lighting equipment)
- ✓ Electrical appliances with CFC (refrigerators, freezers, air conditioners, etc.)
- ✓ Bulky waste: furniture, mattress, mattress base and similar.
- ✓ Clothes and footwear
- ✓ Scrap iron
- ✓ Green waste from pruning and gardening
- ✓ Alkaline and button batteries
- ✓ Hazardous waste packaging
- ✓ Waste mineral oil

- ✓ Waste vegetable oil
- ✓ Fluorescent lamps, low consumption bulbs, low pressure sodium lamps, high intensity discharge lamps, including pressure sodium lamps and metallic halide lamps
- ✓ Car batteries
- ✓ Small quantities of construction and demolition waste from small-scale works
- ✓ Small quantities of reduced size of waste with asbestos

The municipality can modify the list of accepted waste in accordance with the regulations.

Location

The Parc Verd of Binissalem is in:

C/ Camí de l'aigua, 99
